

SCRIPTS

ABOUT SCRIPTS

Getting everything ready to play *The Play's The Thing* is sometimes more difficult than it seems. While we all think we know how Hamlet went down, it gets a bit tough to put the events in the right order and with the right characters. It's even tougher when you've got to summarize everything into just five quick Acts!

To help you out, I've provided everything you need to play through a few of Shakespeare's most famous plays: *Taming of the Shrew*, *Macbeth*, *Hamlet*, *Richard III*, and others. Each Script comes with a short synopsis of the play for your players, a Cast List with Starting Plots, Parts, and Props, lines for each Actor, and the Act summaries. In short, it's everything you need to sit down and play using a Shakespearean work you've never read.

You'll have to forgive me a bit for how much I've butchered these amazing works of art. I had to hack at the plays a bit to get them to fit the format so that your Troupe can use them. If I missed your favorite character or a perfect line, please feel free to add it back in! After all, your Actors are going to be adding their own spin as soon as you start playing.
